

I want to petition that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our family's time at home by enabling us to go hours with uninterrupted conversation without the phone ringing every weekday night. I used to receive about 12 calls per week, now I rarely even receive one in a given week. Personally I feel that this law has benefitted our family in a culture that is full of interruptions and distractions from relationship, we can actually find some sense of solace at home. thank you.
